

POPOVERS | FOR SENIOR LIVING COMMUNITIES

One-to-one connection for residents who need more than the activity calendar.

A focused, nonmedical companionship pilot that supplements your life-enrichment program - without adding another staff schedule.

10 one-hour visits	30 days focused pilot	\$600 total pilot price
------------------------------	---------------------------------	-----------------------------------

Where it fits

- Residents who would benefit from more individual social time.
- People who rarely join group activities or whose families live farther away.
- Conversation, cards, puzzles, reading, music, photo albums, or walks permitted by your community.

How the 30-day pilot works

1. **Choose the residents.** Your team identifies a small pilot group and confirms consent.
2. **Set the guardrails.** We align on site rules, visit times, handoff, and escalation contacts.
3. **Run and review.** Popovers coordinates 10 visits, then reviews fit and next steps at day 30.

A clear division of responsibility

POPOVERS HANDLES	YOUR COMMUNITY PROVIDES
• Companion screening and matching • Visit coordination and confirmations • Nonmedical scope and escalation process	• One designated operational contact • Appropriate residents and required consent • Site rules, access details, and safety contacts
Nonmedical by design. Companions do not provide medication, transfers, personal care, clinical services, financial tasks, or unsupervised transportation.
